CAREER OBJECTIVE

Developer with knowledge in backend development and hands on experience. Hands on experience in building **Spring Boot** projects using **Java and databases**. looking for an **entry level opportunity** to contribute organization's growth with passionate about modernizing my skill set and exploring new frameworks.

EDUCATION

Bachelor of Science (BSC) - Computer Science | Madurai Kamaraj University | June 2023 - April 2026

Higher Secondary Education | TNPM HSS, Rajapalayam | 2022 - 2023

TECHNICAL SKILLS

Languages: Java

Frameworks & Technologies: Spring Boot, Spring Security, REST APIs

Databases: MongoDB, PostgreSQL, Redis

Tools: Git, IntelliJ, Postman, GitHub Issue Tracker

Core Concepts: Object Oriented Programming, Agile

PROJECTS

AI Project Idea Generator | <https://project-idea-generator-bvbt.onrender.com>

Project idea generator is a java and spring boot based app to create and transform user text into a **roadmap** and architectural planning with choice of user selected tech stack

Tools and technologies: Java, Spring Boot, PostgreSQL, Redis, HTML, CSS, JavaScript, Hugging Face API

- Developed a full-stack web application using **Java and Spring Boot** to **create software project ideas based on user input**.
- Integrated the **Hugging Face API** to dynamically create project architectures, database schemas, API endpoints, and learning roadmaps.
- Implemented **PostgreSQL for persistent data storage** and **Redis caching** to improve application performance and session management.
- Utilized an **LLM AI to build a responsive frontend** interface using HTML, CSS, and JavaScript with asynchronous API communication and **carefully reviewed the code and fixed the vulnerability and issues**.
- With the help of Render.io cloud app, **Deployed the application on cloud platforms** and published project and ensured a real world availability.

Aj Shop - E-Commerce Backend Application | Unpublished

Is a rest service of ecommerce application where user can browse, add to cart and proceed purchase of shopping items

- **Integrated with Java, Spring Boot, and MongoDB** to create an e-commerce rest service.
- Implemented a **security with JWT-based authentication** and user specific cart and order functionality.
- Created **REST APIs for product, cart, and order management and purchase control** and documented properly with a **SWAGGER**.
- Utilized a **POSTMAN tool to verify the integrity** of the created Apis.

EXPERIENCE

Micro Intern (Web Development) @ Anjana Infotech

May 2025 – May 2025 | Virudhunagar

- Completed an internship focused on foundational web development.
- Finished practical technical tasks assigned by the industry mentor.
- Gained hands on experience in building and designing web pages.

CERTIFICATIONS

- AI Skills Fest 2026 - Microsoft
- Java Assessment Certification - LearnTube
- Spring Basics with Spring Boot - Infosys Springboard
